

Recommendation Letter

Student Name: Mubashir Ali

Date of Birth: May 14, 2005

School: Uswa College Islamabad

It is my pleasure to recommend Mubashir Ali for admission to Haverford College. As his school counselor at Uswa College Islamabad, I have had the opportunity to observe his academic progress, character, and resilience during an especially challenging period of his life.

Mubashir completed his higher secondary education under Pakistan's board-based system, where subject combinations are fixed by the examination board. During his final years, he pursued the Science (PCB) track, Physics, Chemistry, and Biology. Although Mathematics and Computer Science were not available within his selected subject combination in Grade 12, Mubashir consistently demonstrated strong analytical ability, curiosity, and academic discipline.

What distinguishes Mubashir is his exceptional self-motivation. Recognizing the gap between his academic interests and available school offerings, he independently enrolled in undergraduate-level Computer Science coursework at the University of the People. Through this initiative, he developed programming, computational thinking, and problem-solving skills well beyond the expectations of a typical high school graduate. This decision reflects intellectual maturity and readiness for rigorous higher education.

Mubashir's academic journey has been shaped by significant personal challenges. His family was internally displaced due to long-standing border conflict in the Kharmand region, resulting in relocation, loss of land, and financial hardship. Despite these disruptions, he maintained focus on his studies and took on additional family responsibilities. His perseverance under such circumstances speaks strongly to his character.

Beyond academics, Mubashir has shown a commitment to service and impact. He volunteered at Shaukat Khanum Memorial Cancer Hospital, contributing to patient support and community outreach efforts. He has also demonstrated initiative through independent projects, including the development of a Visual Studio Code extension for biological data exploration, highlighting his ability to apply knowledge meaningfully.

Mubashir Ali is a resilient, disciplined, and self-directed learner with a strong sense of purpose. I am confident that he will thrive in a collaborative and intellectually demanding environment like Haverford College and contribute positively to its academic and community life.

I recommend him without reservation.

Sincerely,

Ali Asghar

School Counselor
