To Whom It May Concern,

I am pleased to recommend Mubashir Ali, who was my student in Biology during his High School at USWA College, Islamabad. Throughout his time in my class, Mubashir consistently demonstrated exceptional curiosity, diligence, and intellectual maturity. He approached complex biological concepts with critical thinking and a strong analytical mindset that clearly distinguished him from his peers.

Beyond academic excellence, Mubashir has shown remarkable initiative and dedication to the field of Medicine. He pursued advanced programs such as Healthcare with AI Specialization, Stanford Food and Health, Bioinformatics and Methods, IBM Data Science, and Google Data Analytics, which strengthened his understanding of medical research, patient data analysis, and healthcare innovation. He also developed the GeneFix AI Bio-Data-Hub to explore biological datasets, demonstrating not only his technical skill but also his exceptional ability to apply modern computational tools in medical and biological contexts.

Mubashir's commitment to service and community is equally admirable. He volunteered at Shaikat Khanum Memorial Cancer Hospital, assisting patients and supporting community outreach initiatives. His character reflects a balance of intelligence, compassion, responsibility, and leadership.

I am confident that Mubashir will thrive in a rigorous academic environment. His passion for learning, perseverance in challenging fields, and interdisciplinary mindset make him an outstanding candidate for Medicine at Hacettepe University. I give him my strongest recommendation for admission and for any academic opportunities he seeks.

Sincerely,

Ismatullah Khan Niazi

Biology Teacher

USWA College, Islamabad
