

School Report – Uswa College Islamabad

School Name: Uswa College Islamabad

Location: Saif Ali Educational Complex, Japan Road, Sehala, Islamabad, Pakistan

Curriculum: Board-based Higher Secondary Education System (Pakistan)

Uswa College Islamabad follows a board-regulated curriculum, where subject combinations and assessment structures are fixed by the examination board rather than individualized coursework lists by grade level. Students select subject groups that determine their academic pathway in the final years of secondary school.

Academic Structure

In Grades 11–12, students enroll in predefined subject tracks. Mubashir Ali completed the Science (PCB) track, consisting of:

- Physics
- Chemistry
- Biology

Student Academic Performance

Mubashir Ali demonstrated strong academic performance, earning a weighted GPA of 3.50 on a 4.0 scale and ranking 10th out of 50 students in his class. He consistently showed discipline, intellectual curiosity, and responsibility in his coursework.

Contextual Factors

Mubashir's secondary education occurred under significant personal and socio-economic challenges. His family was internally displaced due to long-standing border tensions in the Kharmand region, resulting in relocation, loss of land, and financial instability. Despite these circumstances, Mubashir remained committed to his education.

Academic Initiative Beyond School Curriculum

To address the absence of Mathematics and Computer Science in his high school curriculum, Mubashir independently pursued undergraduate-level coursework at the University of the People, focusing on Computer Science and related disciplines. This initiative demonstrates exceptional self-motivation, adaptability, and readiness for rigorous academic environments.

Counselor Evaluation

Mubashir Ali is a resilient, self-directed learner who actively seeks knowledge beyond formal requirements. His ability to overcome structural and personal limitations, combined with his academic performance and independent learning efforts, indicates strong potential for success in a demanding liberal arts environment such as Haverford College.

I strongly support his application and recommend him without reservation.
